## SUMMARY

Delivery Motivated web developer with 3 years of experience in designing and maintaining scalable applications using React.js, Redux, Next.js, and TypeScript. Skilled in frontend and backend development, RESTful APIs, and unit testing. Experienced in agile teams and SCRUM methodology. Seeking a remote role to leverage these skills effectively.

## EXPERIENCE

### React.js Developer                                    08/2022 - Present

#### Rawcubes India Private Limited, Noida                Noida

- Led delivery of scalable technical solutions, meeting business requirements with React.js and TypeScript
- Designed, developed, tested, and maintained software applications, focusing on high quality and innovation.
- Performed hands-on coding and provided code reviews to ensure efficiency and code quality.
- Collaborated with agile teams and followed SCRUM methodology for design and implementation.
- Integrated third-party APIs to enhance application functionality and data retrieval.
- Experienced in writing unit tests with Jest and proficient in GitHub for version control
- Refactored code for efficiency, applied OOP and functional programming principles, and created responsive layouts using React, HTML5, CSS3,Material UI and CSS preprocessors like Less/Sass.

### Junior Software Engineer                              08/2021 - 07/2022

#### Brain Technosys Pvt Ltd                              Noida

- Contributed to all phases of the development lifecycle, from design to writing and developing, mostly on the backend.
- Developed APIs to return data for the dashboard.
- Skilled in CRUD operations, proficiently implementing Create, Read, Update, and Delete functionalities to manage data effectively in applications.

## PROJECTS

### iDataOps                                             11/2023 - 2024

Machine Monitoring Software :-Overcome downtime challenges by tracking machine operations in real-time, utilizing advanced OEE, and enhance overall operational efficiency.

### qDataOps                                             08/2022 – 11/2023

Introducing Quality Console, a centralized Quality Control Command Center for real-time monitoring of manufacturing quality checks. Automate data quality checks, streamline inspection processes, and empower decision makers with data-driven dashboards. Elevate your quality management system and make informed,strategic decisions for enhanced business performance.

### Data Asset Management System                         08/2021 - 07/2022

Developed a web app to track assets and employees, manage attendance, and maintain vendor and office information.

**Utilized Technologies**:- Spring Boot, React.js, and MySQL.
